

Introducing the DST10 and DST15 Hard Drive Shredders

DST10 Hard Drive Shredder

Standard Features:

- 35"L x 18"W x 43"H
- 1HP motor, 115v
- 1 1/2" shred width
- 180-240 drives/hour
- Slide open entry slot
- In-feed: 4 1/2" W x 1 1/2" H
- Heavy duty casters
- Viewing window
- Hour meter
- Discharge bin
- Weight: 1,005 Lbs.

Electronics are the fastest growing segment of the waste stream. We created four models of e-scrap shredders in response and are pleased to add two new models that no one else in the industry is offering.

The DST10 and DST15 address the immense amount of requests we have received for a mobile data destruction shredder that has less throughput and a smaller footprint than our other models. Both shredders will plug into a standard wall outlet and fit through an office door.

These versatile shredders are perfect for recyclers whether they are plant based, mobile or an independent end user. They will shred hard disks,* CD's, DVD's, cell phones, floppy disks, DLT tapes and other assorted small e-waste.

*The DS 10 and DS 15 units are not engineered to shred legacy style hard drives of 8" long x 6" wide x 3" high. These require our more robust models, the DS 150 or DS 200.

Introducing the DST10 and DST15 Hard Drive Shredders

DST15 Hard Drive Shredder

Standard Features:

- 44" L x 23" W x 48" H
- 1.5HP motor
- 1 1/2" shred width
- 180-240 drives/hour
- 1 or 3 phase power
- Mailbox entry slot
- In-feed: 5 7/16" W x 1 3/4" H
- Locked storage compartment
- Viewing window
- Hour meter
- Heavy duty casters
- Discharge bin
- Weight: 1,236 Lbs.
